Model WYZECPAN3

Wyze Cam Floodlight with 2600 lumen LEDs, wired 1080p HD IP65 outdoor camera, color night vision, 270-degree customizable motion detection, 105dB siren, and two-way audio

Two super bright, adjustable LEDs for a combined 2600 lumens of light, and a handy dimming option where less brightness is desired.

Three individually controlled PIR sensors provide for 270 degrees of customizable motion detection. Range and sensitivity are adjustable up to 30 feet.

Built in Wyze Cam v3 provides sound detection, as well as artificial intelligence and the ability to identify and record motion, with or without the floodlight, in 1080p Full HD with Starlight Sensor color night vision.

Dusk to Dawn automation the Wyze cam floodlight knows when the sun is down and when it's up. No need to turn the floodlight on or off once it's connected.
