Provide Community Empowerment by Funding a Generator

#49

Starting Bid **\$5,000.00**

Donated by You!

Help provide reliable electricity sources for uninterrupted ministry by funding a generator.

Cost of a Generators - \$5,000 - \$20,000 depending on size

- We are always in need of generators since the infrastructure of the towns in Africa where we work, even in a city, is very unpredictable.
- Running radio stations with high powered, expensive equipment and the consistency needed for the programs, the house of prayer that has community services night and day require reliable electricity.
- All the crusade outreaches that we do that reaches anywhere from 100 to 1 million people, take field generators for running the equipment. All our ministry compounds and offices

require a backup generator for when the city power may go off which can be 50% of the time.

- The sizes of the generator would go from a smaller 4 kw up to 20 or 25 kw for running the whole compound and the radio station at the same time. We are always needing them in one compound or another as our offices are expanding in both countries.
