Starting Bid **\$250.00**

Retail Value \$2,500.00

1 Available

Donated by Med Lounge- Ladera Ranch

It is not too late for that beach body! Med Lounge has donated a 4 pack of Emsculpt! Emsculpt Neo is the latest technology from Emsculpt, a body contouring procedure that burns fat and builds muscle without ever having to hit the gym. Treatments combine radio-frequency (RF) energy and high-intensity focused electromagnetic (HIFEM) technology for added heat and more efficient results that haven't been seen before. Define that 6-pack, lift that booty, tighten your arms, slim down saddlebags and tone up your legs without even a squat using this revolutionary device. The skin tightening results you'll see from your sessions of Emsculpt Neo are achieved by intense muscle contractions that are impossible to match the intensity of in the gym. Increase muscle mass, tone up problem areas and reduce excess fat where efforts at diet and exercise have failed in the past. If you're looking for Emsculpt in Orange County, our experts at the Med Lounge are here to help you get closer to that body you desire. Say goodbye to stubborn fat and hello to a trimmed-up new you with Emsculpt Neo.
